

Industry value mapping / category taxonomy

[Mingfei Bi](#), UI/UX Designer, [WWSO Generative AI](#)

Background & Purpose

This document aims to establish an industry value map taxonomy by integrating information from the AWS Solution Library, user cases from Executive Summary reports, and feedback received on July 18th and 31st regarding the Demo Portal industry homepage designs. We have initiated a value map (taxonomy) for services and industries based on initial assumptions and hypotheses. Although these initial settings involve several assumptions, we utilize this document as a starting point to facilitate discussions with our internal team, enabling us to refine our approach and better align with our Demo Portal objectives.

Will these categories change?

Who owns updating these categories?

Proposed value map setting for services

	Service	Feature	Value Chain	Use case	Source	Comments
1	Amazon Q	Amazon Q Business	Deployment and management	Conversational experience with generative prompts and tasks	Service intro page	
2				Easy deployment and management	Service intro page	
3			Security and governance	Securely connect your workforce to Amazon Q Business applications, and centrally manage workforce access using AWS IAM Identity Center.	Service intro page	
4			Amazon Q Apps	Rapidly create secure and customized apps using your enterprise data with Amazon Q Apps, a capability of Amazon Q Business.	Service intro page	

5		Amazon Q Developer	AI assistant for AWS	Get assistance for building on AWS and beyond	Service intro page	
6			Design and build	Build new features in a fraction of the time	Service intro page	
7			Troubleshoot	Diagnose errors in the console in seconds, not hours	Service intro page	
8			Transform	Upgrade Java apps to the latest language version	Service intro page	
9			Analyze and integrate data	Integrate data using natural language and From natural language to SQL queries	Service intro page	
10			Build ML models	Accelerate model development	Service intro page	
11		Amazon QuickSight	Embedded analytics	Embed data visuals, dashboards, and NLQ into any application	Service intro page	
12			Pixel-perfect Reports	Create, schedule, and share reports and data exports	Service intro page	
13		Amazon Connect	Agent Workspace	Empower agents with a unified generative AI-powered experience in just a few clicks.	Service intro page	
14			Contact Lens	Real-time contact center analytics and quality management powered by artificial intelligence	Service intro page	
15			Messaging	Improve customer satisfaction and agent productivity with seamless chat and SMS experience	Service intro page	

16		AWS Supply Chain (Coming Soon)			Service intro page	
17	Amazon Bedrock	Agents	Deployment and Issue Resolution	Orchestrate tasks and API calls to optimize deployment and resolve issues efficiently.	Integrated Analysis	
18		Guardrails	Compliant AI Development	Offer secure customization and fine-tuning of Claude models through Amazon Bedrock, optimizing performance while limiting the potential for harmful outputs.	Integrated Analysis	
19		Developer Experience	Code Assistance and Optimization	Enhance the developer experience by providing tools and AI models that improve coding	Integrated Analysis	
20		Custom model import	Custom AI Solutions	Enables the import and integration of customer models, allowing tailored AI solutions that meet specific business needs.	Integrated Analysis	
21		Knowledge bases	Technical Support and Assistance	Supports the creation of intelligent assistants that provide accurate information and step-by-step guidance using a customized knowledge base.	Integrated Analysis	
22	Amazon SageMaker	No Code Development	Creative Design and Development	Facilitate the transition from manual design to automated processes without requiring extensive coding and infrastructure management.	Integrated Analysis	

23			Custom AI Development	With other AWS services allow users to build, train, and deploy custom AI models tailored to specific business needs, including the creation of visual interfaces for generating design variations and automating content creation.	Integrated Analysis	
24		ML Lifecycle	AI Model Training and Development	Support the training and development of generative AI models, facilitating various stages of the ML lifecycle, from model development to deployment.	Integrated Analysis	
25			Model Scaling	Optimizes resource utilization and reduces costs by enabling scalable deployment of AI models through multi-model endpoints.	Integrated Analysis	

Proposed value map setting for industries

	Industry	Sgement	Value Chain Step	Use case	Source	Comments
1	Financial Services	Banking	Personalized marketing content	Generate Personalized marketing content targeted at financial services customers	Executive summary	
2			Call center and customer services	Improve the call center and service desk experience for banking	Executive summary	
3			Customer Interaction and marketing	Personalized Content Creation	Manager inputs	
4				Intelligent Chatbots and Virtual Assistants	Manager inputs	

5			Onboarding and KYC	Intelligent Document Processing	Manager inputs	
6				Tailored onboarding	Manager inputs	
7			Loan Origination	Automated Application Completion:	Manager inputs	
8				Dynamic Document Generation	Manager inputs	
9			Credit Decisioning	Alternative Data Analysis	Manager inputs	
10				Explainable AI for Credit Decisions	Manager inputs	
11			Fraud and Surveillance	Anomaly Detection and Explanation	Manager inputs	
12				Synthetic Data Generation	Manager inputs	
13		Capital Markets	Fraud investigation and AML	Improve investigations of fraud and anti-money laundering(AML)	Executive summary	
14			Personalized marketing content	Generate Personalized marketing content targeted at financial services customers	Executive summary	
15			Analyst assistant	Investment analyst assistant	Executive summary	
16			Call center and customer services	Improve the call center and service desk experience for wealth management	Executive summary	
17			Automating compliance processes	Automate the investment management compliance process	Executive summary	
18		Insurance	Insurance claims assistant	Insurance claims assistant	Executive summary	
19			Service desk experience	Improve the call center and service desk experience for insurance	Executive summary	

20			Automating compliance processes	Automating the investment management compliance process	Executive summary	
21	Healthcare, Life Sciences, and Genomics	Healthcare	Clinical notes generation	Optimize patient care through automated clinical documentation	Integrated Analysis	
22			Clinical record retrieval	Retrieve clinical records with ai-powered clinical assistant	Integrated Analysis	
23			Population health assistant	Drive population health with unified data insights	Integrated Analysis	
24			Medical images interpretation	Interpret medical images accurately with ai-driven insights	Integrated Analysis	
25		Life Sciences	Drug discovery	Accelerate drug discovery and research	Integrated Analysis	
26			Drug manufacturing	Optimize drug manufacturing quality through data generation	Integrated Analysis	
27			Clinical development	Optimize clinical trials and patient safety	Integrated Analysis	
28			Marketing content compliance	Enable rapid compliant content creation for life sciences sales and marketing	Integrated Analysis	
29		Genomics	Data aggregation & governance	Data Security & Compliance	Solution library	
30				Multi-Omics & Multi-Modal Data Analysis	Solution library	
31			Data Transfer & Storage	Data Upload Automations	Solution library	
32				Genomic Data Sharing	Solution library	
33			Secondary Analysis	Interactive Analysis	Solution library	

34				Workflow Automation	Solution library	
35			Tertiary Analysis	Tertiary Analysis & ML	Solution library	
36	Energy & utilities	Power & Utilities	Insights Assistant	Leverage research to provide customers with concise answers and source documentation for energy related queries	Integrated Analysis	
37			IT service desk assistant	Automate resolution steps and intelligently route tickets to relevant teams	Integrated Analysis	
38			Smart ingestion & search	Enhance data access and analysis by enabling natural language queries of Energy Data Insights on AWS.	Integrated Analysis	
39			Business consolidation	Streamline the unification of operating procedures as it consolidated multiple business units into a single unit.	Integrated Analysis	
40			Rate case filing	User case is planned to launch in Aug 2024	Integrated Analysis	
41		Oil & Gas	Well log analysis	User case is planned to launch in Aug 2024	Integrated Analysis	
42			Subsurface	Seismic Processing	Solution library	
43			Development	Drilling & Completions Data Analytics	Solution library	
44			Upstream Production Operations	Production Monitoring & Surveillance	Solution library	
45				Equipment Health & Performance Optimization	Solution library	
46				Production Optimization	Solution library	
47			Downstream Refining Operations	Refinery Monitoring & Surveillance	Solution library	

48				Equipment Health & Maintenance	Solution library	
49				Connected Field Work	Solution library	
50				Downstream Logistics Optimization	Solution library	
51				Process Optimization	Solution library	
52			Digital Operations Foundation	Asset Sensing & Inspections	Solution library	
53				Historian Extension	Solution library	
54				Industrial Data Fabric	Solution library	
55				SCADA Hosting & Extension	Solution library	
56	Automotive	Software-defined vehicles	Cloud infrastructure	Improve developer productivity with an optimized cloud infrastructure	Integrated Analysis	
57			Software development workflows	Accelerate software development with streamlined workflows	Integrated Analysis	
58			Cybersecurity	-	Solution library	
59			Over-the-Air Updates	-	Solution library	
60			Vehicle Data Collection	-	Solution library	
61			Virtual Engineering Workbench	-	Solution library	

62		Autonomous Vehicle Development	Scene discovery for AV/ADAS	Accelerate scene discovery for AV/ADAS feature innovation	Integrated Analysis	
63			Synthetic data generation	Unlock AV/ADAS potential with synthetic data generation	Integrated Analysis	
64			Data Collection, Ingestion & Enrichment	-	Solution library	
65			Data Labeling & Anonymization	-	Solution library	
66			Data Management, Processing & Analytics	-	Solution library	
67			Model & Algorithm Development	-	Solution library	
68			Simulation & Verification	-	Solution library	
69		Product Engineering	Vehicle diagnostics and repair	Expedite and simplify vehicle diagnostics and repair	Executive summary	
70			Vehicle design and development	Transform the vehicle design process	Executive summary	
71			Validation & Simulation	-	Solution library	
72		Digital Customer Experience	Vehicle in-cabin experience	Reimagine the vehicle in-cabin experience	Executive summary	
73			Personalized vehicle shopping	Personalize the online vehicle shopping experience	Executive summary	
74			Customer Care & Contact Center	-	Solution library	

75			Seamless Customer Experience	-	Solution library	
76			Digital Commerce	-	Solution library	
77			Negotiation, Purchase & Finance	-	Solution library	
78			Parts, Service & Maintenance	-	Solution library	
79		Manufacturing	Total 12 items	-	Solution library	
80		Connectivity	Total 5 items	-	Solution library	
81		Sustainability	Total 3 items	-	Solution library	
82		Supply Chain	Total 3 items	-	Solution library	
83	Advertising and Marketing	Ad Intelligence & Measurement	Insights assistant	Automate brand advertising campaign development using generative AI, enhancing campaign management efficiency.	Executive summary	
84			Measurement, Attribution & Verification	-	Solution library	
85			Contextual Analysis	-	Solution library	
86			Machine Learning for Real-Time Advertising	-	Solution library	
87		Privacy-Enhanced Data Collaboration	Brand safety	Revolutionize branding in online shopping with an immersive live platform that facilitates real-time engagement and boosts sales through live events on brand websites.	Integrated Analysis	

88			Creative audit & quality control	Enhances content audit with Amazon Comprehend, reducing false negatives, while a PR agency accelerates AI application development using Amazon Bedrock.	Integrated Analysis	
89			Content moderation	Automate image and video moderation solutions.	Integrated Analysis	
90		Audience analysis	Segmentation	Power customer segmentation engine.	Integrated Analysis	
91			Personalization	Deliver hyper-personalized news, sports, and entertainment content.	Integrated Analysis	
92			Customer 360 Profile		Solution library	
93		Digital Customer Experience	Customer Support	Enhance customer experience via voice bot.	Integrated Analysis	
94			Customer Loyalty	Empower brands to acquire, grow, and retain customers.	Integrated Analysis	
95		Ad Platforms	Contextual Advertising	Highlight the power of cross-channel marketing campaigns and personalized FAST channels to drive viewer engagement.	Integrated Analysis	
96			Content Monetization	Deliver a more accurate and faster bidding solution.	Integrated Analysis	
97			Real-Time Advertising		Solution library	
98	Telecom	Telecommunications network	Deployment Acceleration	Provide coding assistance to its network engineers.	Integrated Analysis	

99			Network Operations Simplification	Enable real-time detection of issues like faults and SLA breaches, diagnose problems, provide recommendations, and take actions to resolve network issues.	Integrated Analysis	
100		Customer Experience	Customer Experience Elevation	Revolutionize contact centers, transforming them into competitive advantages.	Integrated Analysis	
101			Customized LLMs	build and make available a new family of Italian language LLMs.	Integrated Analysis	
102		Enterprise Financial Services	Revenue assurance and Fraud protection	Detects telecom fraud in real-time by analyzing call records and usage patterns to identify anomalies	Integrated Analysis	
103		Marketing	Personalized marketing content	Enhance sales team's productivity, augment their work with impactful creative and new ideas, and free up more time to pursue leads, foster relationships with customers, and devise more effective sales strategies.	Integrated Analysis	
104	Games	Game Design	Narrative Inspiration	Unleash the storytelling prowess with generative AI.	Integrated Analysis	
105			Prototyping Acceleration	Rapidly generate concept art, prototype game assets and music to breathe life into the virtual realms.	Integrated Analysis	

106		Cloud Game Development	Code Suggestion	Supercharges game development with intelligent code suggestions tailored to the codebase and comments, ensuring highly relevant and accurate recommendations.	Integrated Analysis	
107		Customer Experience	Create custom in-game experience	Empower game developers to redefine player experiences	Integrated Analysis	
108			Improve support and player self-service	Help company to improve the efficiency and quality of global customer care and support.	Integrated Analysis	
109		Game Servers	Game Infrastructure for Session-Based Games	-	Solution library	
110			Persistent World Games Infrastructure	-	Solution library	
111		Live Operations	Game Backend as a Service	-	Solution library	
112		Game Analytics	Centralized Game Analytics	-	Solution library	
113			Player Insights	-	Solution library	
114	Industrial Manufacturing	Workspace troubleshooting	Assisted Diagnosis	Improve shop floor productivity with faster diagnosis and issue resolution	Integrated Analysis	
115			Precision Anomaly Response	Improve anomaly remediation time and operational resilience	Integrated Analysis	

116			Advanced Defect Detection	Enhance product quality and operational efficiency with synthetic image data	Integrated Analysis	
117		Enterprise management	Personnel Onboarding	Reduce personnel onboarding and training time	Integrated Analysis	
118			Interactive Inventory Trends Analysis	Improve supply chain agility and decision making	Integrated Analysis	
119			Innovation & Operational Excellence	Foster a culture of innovation and drive business transformation	Integrated Analysis	
120		Engineering & Design	Optimized Product Design and Engineering	Reimagine product design and accelerate innovation process	Executive summary	
121			Computer Aided Engineering	-	Solution library	
122			Product Lifecycle Management	-	Solution library	
123		Smart Manufacturing	Asset Maintenance & Reliability	-	Solution library	
124			Asset Performance Management	-	Solution library	
125			Automation Software Management	-	Solution library	
126			Industrial Data Fabric	-	Solution library	
127			Lean Daily Management	-	Solution library	

1 2 8			Predictive Quality	-	Solution library	
1 2 9		Sustainability	Energy Use Optimization	-	Solution library	
1 3 0			ESG Reporting & Disclosures	-	Solution library	
1 3 1			Product Carbon Footprint	-	Solution library	
1 3 2		Supply Chain Management	Driver-Based Demand Planning	-	Solution library	
1 3 3			Multi-Modal Transportation Visibility	-	Solution library	
1 3 4			Warehouse Management	-	Solution library	
1 3 5	Retail and Consumer Goods	Digital Commerce	Digital shopping assistants	Streamline the shopping experience with digital support	Executive summary	
1 3 6			Product Content Generation	-	Solution library	
1 3 7			Website Performance & Security	-	Solution library	
1 3 8			Content Management System	-	Solution library	
1 3 9			Digital Experience Management	-	Solution library	

140		Merchandising & Planning	Accelerate Product Development	Develop innovative products, ensure product accuracy online, and reduce time to market	Executive summary	
141			Category Management	-	Solution library	
142			Fresh Item Management	-	Solution library	
143			Price & Promotions Recommendations	-	Solution library	
144			Product Information Management	-	Solution library	
145		Advanced Data Insights	Generative Business Intelligence	Seamlessly analyze data, delivering real-time, actionable insights and answers in seconds.	Integrated Analysis	
146			Automated Language Translation	-	Solution library	
147			Document Processing	-	Solution library	
148			Product Analytics	-	Solution library	
149		Enterprise Management	Knowledge management	AWS offers multiple services and solutions that Enable the workforce to tap into the power of generative AI to generate more ideas, complete work faster, and with higher quality.	Integrated Analysis	

150		Intelligent Supply Chain	Distributed Order Management	-	Solution library	
151			Supply Chain Optimization	-	Solution library	
152			Value Chain Transparency	-	Solution library	
153			Warehouse Management	-	Solution library	
154	Media and Entertainment	Media Supply Chain & Archive	Advanced Media and Document Search	Improve on keyword searches with an advanced semantic search for media metadata, archives, and documents using convenient natural language queries	Executive summary	
155			Media Asset Localization	Translation and localization of media assets	Executive summary	
156			Archive Migration	-	Solution library	
157			Media Processing & Quality Control	-	Solution library	
158			Rights & Metadata Management	-	Solution library	
159			Workflow Orchestration	-	Solution library	

160		Data Science & Analytics for Media	Text Transformation and Generation	Generative AI models can be used for reading and writing assistance, such as summarizing, repurposing, rewriting, and translating text.	Integrated Analysis	
161			Asset Transformation and Generation	Transformation or creation of images and video assets.	Executive summary	
162		Monetization	Advertising & Marketing	Automate advertising campaign development on behalf of brands.	Integrated Analysis	
163			Subscription Management	-	Solution library	
164		Content Production	Post Production	-	Solution library	
165		Direct-to-Consumer & Streaming	Consumer Experience	-	Solution library	
166			Intelligent Operations	-	Solution library	
167			Streaming Media	-	Solution library
